PROJECTS

E-commerce

2024

This is an e-commerce site for selling products online. It categorizes the products from the control panel, adds its products, and controls them.

Technologies: HTML, CSS, jQuery, Bootstrap, PHP and PDO

Travel Agency 2024

This project aims to build a comprehensive travel agency management system using Laravel. The system offers tools to manage bookings, clients, trips, and staff, starting with a secure login interface. It allows for adding, editing, and deleting bookings, client data, and trip details, as well as managing staff information.

Technologies: PHP Laravel, MySQL and Bootstrap

Coffee Shop 2024

The project is a Coffee Shop Management System built using PHP and the Laravel framework. Its primary goal is to streamline daily operations in a coffee shop, including sales tracking, inventory management, order organization, and customer and staff management. The system features a user-friendly interface that simplifies these tasks, enhancing the overall efficiency and effectiveness of managing the coffee shop.

Technologies: PHP Laravel, MySQL and Bootstrap

Food E-commerce 2024

The project is a Food Ordering E-commerce Store built using PHP and Laravel. Its main goal is to provide an online platform where customers can browse, select, and order food items. The system includes features for managing products, processing orders, handling payments, and maintaining customer profiles. It offers a seamless user experience, ensuring efficient order management and a smooth shopping process for customers.

Technologies: PHP Laravel, MySQL and Bootstrap
